The expense of navy competition has been stopped and congress should enable the American navy to keep the position to which it is entitled. The treaty is good if America keeps its rights under it. It is bad if America permits navy weakness to result from lack of appropriations.

It is not enough to have a stipulated number of battleships. The fleet must have all its proper component parts to be the protection required by the country.

CHICAGO'S DESTINY.

The city council spetition to congress for a detailed study of the question of fixed bridges over the Chicago river, coupled with Mayor Dever's submission of the Nickel Plate railroad's plan for early development of an industrial harbor in Lake Calument, ought to mark a step forward in the development of Chicago as, a tremendous industrial and commercial center.

First of these two improvements we need the harbor. It is essential to the full development of Chicago's industrial and commercial possibilities. Without such a terminal and potential transfer point for water borne freight this district is marriaged in the full development of the matural advantage of its location with reference to lake trade routes. It will be sacrificing much of the natural advantage of its location with reference to lake trade routes. It will be sacrificing much of the St. Lawrence seaway and the completion of the St. Lawrence seaway and the large as a spirit spun. On Gold's own loom to make a an angel gay.

What do we get for our taxes? Do we get a d worth of service for every dollar we pay? That is the program for navy aviation. Money is needed to elevate the turret guns of the thirteen treaty battleships to increase their range and power. There has been a dispute in the departments of American government over the right to increase the range, ander the treaty. In the state department it was apposed as an infringement of agreement. The navy department advisers say there is nothing in the treaty which prohibits or can be construed to sevent the elevation of guns. It is not even a piclation of the spirit of the treaty.

Chicago, Dec. 12.—I read THE TRIBURE every day and I read with interest the crusade which Mayor Dever and Chief of Police Collins are making against the auto speeders and reckless drivers. I most heartly approve of their plan for the eafety of the public, but in regard to stopping at through streets I say that the city ought to put a light on the stop signs. It is impossible to see the signs after dark, and the driver does not have a chance if he is in a strange neighborhood. Light the signs and then if a driver does not stop as he should, arrest him and let him take a fine. As it is the driver has no chance.

R. GREGORY.

A MOTORIST'S COMPLAINT.

Chicago, Dec. 2.—I have read your editorial on motor killings today with its cry that "stop" signs are ignored by motorists, and asking that more or less everybody be arrested who gets by a stop sign, or has a light out, or parks over night on a street curb, or drives with lights that giare.

I believe that you are utterly wrong. Cartainly the city does not seem to have been led anywhere in the past by its police policies inwards motorists except down the alley of graft and a wholesale system of "getting lickets pulled" that have been handed out in wholesale disregard of equity, common sense, and civio decency.

have been handed out in wholesale disregard of equity, common sense, and civio decency.

My experience in getting arrested in Chicago suggests that if Mr. Villa did it we would have an army going down his way to suppress banditry.

For instance, I was going south through the West park system Friday svening. I struck a place shortly south of Douglas park marked "Detour, Park Drive Closed." I turned eastward and soon found myself on a cobblestone road without an electric light anywhere in sight. I saw I was approaching a tunnel going under some tracks, and I turned my lights on full. It was certainly an act contributing to public safety. It certainly harmed no one. Otherwise I would have been in Egyptian darkness.

Yet as I emerged from that tunnel I ran square into a policeman who whistled me over to a curb and started the regular process of handing me a summons. "It's against the law to have bright lights anywhere in Chicago," he mid, "and we have special instructions today to enforce this law."

In New York I would have had in my pocket a little book from the police commissioner's office tailing me how the police expected me to drive. It wouldn't have had a nasty, growing, derrogatory word in it. It would have easid—the one I carried for years did my—that the commissioner took it for granted that the car owner was a decent, law abiding citizen who wanted to do right and display common sense. He thereupon pledged the werd of the police that the car driver trying to do right would not

hy new readers flock to McCall Street

McCall's has a clean-cut editorial program—every contribution in it is selected to meet a desire common to all intelligent women.

THE brilliant fiction in McCall's is written only by authors who believe life is not all drab and dull, and who teach that needed lesson in terms of teeming drama. The arresting articles discuss the problems upon the proper solution of which a worth-while journey thru life can be based. The contributions to home-making; to the physical care of the body; to the social aspects of daily intercourse are designed to place the reader on the road leading to success and contentment.

In the management of her home and family McCall's offers every woman such practical, authoritative, interesting help that two million American households find it indispensable.

From home to home, the McCall message is spread by one reader telling another of the great service this magazine renders—instructive, helpful, saving—and more and still more families come to live on McCall's Street!

How McCall's Is Creating Better American Homes

There is no phase of family life-from the actual building of the home, its furnishing and management, to the clothing, feeding and health of its inmates—that is not thoroughly and practically covered by McCall's.

World-famous authorities perform this great mission through the departments in the magazine, Service Booklets, and personal letters.

Home - Building — Architecture to transform the small homes into a thing of beauty and to plan small homes for the benefit of the woman who is to do the housework—to meet the actual living conditions of American families today—these are the fundamental purposes of McCall's new articles on small house building. The McCall small houses are designed by America's foremost small-house architects, among whom are such distinguished persons as: Ernest Flagg, Clarence Stein, Aymar Embury II, Otto R. Eggers, of The Office of John Russel Pope—all co-operating with the well-known woman architect, Marcia Mead.

Interior Decoration is given by Mrs.

Interior Decoration is given by Mrs. Ruby Ross Goodnow, one of the leading decorators of America.

The Heart of Woman—The women and girls of America look to Winona Wilcox, of McCall's, as their closest confidant—asking her advice on personal problems of the heart and home. Winona Wilcox—friendly, mature, motherly—out of her long experience with such problems gives careful, sound advice on each separate case. The friends she has made mount into the millions.

Fashions—The women who live on McCall Street are the best dressed women in the world. Great French couturiers inspire the styles and create directly the fashions for McCall's. Paul Poiret himself designs for McCall's.

The McCall Printed Pattern-the greatest labor saving device for women since the invention of the sewing machine. Its economy and accuracy and simplicity have made home dressmaking universal. The McCall Printed Pattern not only enables the women of McCall Street to dress better, but also

While no charges will be made against individual physicians or more at the psychopathic hospital as a result of the county board's investigation of this clearing house for Chicago's mental defectives, the general finding of the committee will be that there has been a decided lack of administrative cooperation at the institution and various constructive measurements.

The evidence so far has indicated that in three cases at least lack of immediately available equipment or failure to give proper treatment caused the death of the control of the control

brutality cases is more clusive and controversial. The need of greater facilities and a greater staff of experienced physicians and nurses, with better equipment, is plain.

It is possible that a new hospital of extended treatment of certain types ill be recommended. The statement made by Capt. John A. N. Y. C. Offers 4 Plans; Willard Summoned.

BY OSCAR HEWITT.

Three Stations Involved.

The plans of the New York Central, which are now in the hands of the city, are said to provide facilities sufficient for all of the roads which now use the Dearborn, La Salle, and Grand Central stations.

One plan provides for forty-two tracks, which would occupy the entire space between Franklin street and La Salle street. Another plan uses the space between only La Salle and Wells streets. All of the plans provide for the station proper at Harrison street, which means that the La Salle station group of railroads "will tally affect" the interests of the althours and Ohio, and that he would one every means to obtain coöperation "among the roads.

it means the BEST

The word Calumet means more than merely Baking Powder - it stands for dependability — purity and economy. It is the emblem of the highest quality leavener.

If it were possible for you to forget the name—to just ask for "the Best," in most cases the grocer would give you Calumet.

Experiments are expensive—especially on bake-day. To use leaveners simply because they cost a trifle less than Calumet is to in-vite failure. It generally means ruined bakings—the loss of time and expensive ingredients such as flour, sugar,

For Women and Misses

Sale of Smart Winter Coats \$95, \$125, \$150

It is seldom that one finds such a representative collection of the season's preferred coat fashions as is in this selling—almost never at these very exceptional pricings.

These coats were assembled through a very special purchase and to these interesting assortments were added certain coats from our own stock, making a selection which will, we believe, be of the most worth-while sort for every requirement.

> There Are All the Finer Coat Fabrics And the Richer Furs, Including Rock Sable Viatka-Squirrel and Fox in Varied Dyes

The furs are effectively used in the ways one sees on the more exclusive coats. And the colors include all those rich shades delightfully in harmony with these better furs. Every coat has that finesse of detail which comes only with expert workmanship. There are women's and misses' sizes. Three sketched.

Answers Every Question a Child Can Ask

One of More Than a Million Children in America Who Own and Love the Book of Knowledge.

Curiosity is the great Educator! Through curiosity Columbus discovered America. Every child has the capacity to discover a new world, if you will help him. He pipes all hands on deck in the morning, and starts out on his voyage of discovery. Whether he finds out anything new; whether he brings any real treasure into port at night-any cargo which is worthwhile, all depends upon you. He must not be allowed to drift aimlessly alongshore, but given some definite point to reach. Every hour of every day must be made to count in the education of your child, and he can take with him on his daily voyages no guide so valuable as THE BOOK OF KNOWLEDGE, no friend so wise or so helpful, no companion hetter loved. It is the world of knowledge, so successfully arranged, so beautifully explained, so fascinatingly illustrated that it never fails to capture the mind of a child or of an adult, for that matter. THE BOOK OF KNOWLEDGE IS THE ONE GREAT GIFT OF CHILDHOOD

THE BOOK OF KNOWLEDGE

The Children's Encyclopedia 10,000 Striking Educational Pictures 350 Colored Plates Complete Index

A Work of Genius

What is it that makes all the children, little and big, and even the grown-ups, fall under the spell of THE BOOK OF KNOWLEDGE, so that they love it like a man companion? There are many reasons, but chief among them these: First, the 10,000 striking educational pictures, which arrest and hold the child's attention. Second, the plain and simple language in which the descriptions are written, whether of the pictures or the brief articles which explain them. Third, the three different ways of telling the same thing—by pictures, by articles, by summary. Fourth, the strong appeal to the child's heart and imagination, which is the best reason of all. It is the only work of reference which the children ever really enjoy reading. It is a work of genius and a work of art as well as a little encyclopedra which gives the important information of the world in the simplest and most delightful form. It is the simplest

Opens the Doors of Knowledge

There is for every child some undiscovered country where he will be entirely at home, some open door which he will eagerly enter. The 16 Great Departments, Nature, Science History, Biography, Astronomy, Physiology, Art, Literature, Poetry, Gardening, Carpentry, and Things to Make and to Do, are the open doors for his choosing. Place THE BOOK OF KNOWLEDGE in your home and watch which of them he will open first. Persistence and pleasure are the signs to look for here. You cannot "forcibly feed" the child's mind, but you can give it a chance to find its own natural food.

Let us take the breakfast table and see what we can find out about it in THE BOOK OF KNOWLEDGE. There are many striking pictures, such as "The Making of Bread and Butter"; "The Manufacture of Knives, Forks and Spoons"; "How We Obtain Coffee and Tea," and "Where the Fruit Comes From," or you will learn where that delicious codfish was caught, and how from a fresh fish it became salt and was packed up in barrels and packages. The brief but fascinating descriptions of such subjects as these, written in simple and plain language, hold the child's attention almost as strongly as the pictures themselves.

Carey's remarks on animal caricature were very interesting.

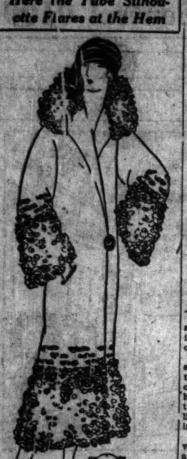

"In caricaturing a horse," be said, "lengthen the head and test and widen the nostrils, emphasizing, as a ways in animal caricature, the things that are the horse's special peculiarity. To illustrate that point I now always draw a horse because the time I drew a cow and put teeth in her."

He drew the hind quarters and talk of three dogs—only that much of them—and I'm blessed if one dog was not obviously jovial, and the second a coward, and the third just characteries—what you would call a no-account dog. er it is an idea that will have any lasting position in popularity is doubtful, for the reason that its adoption presupposes that a man is partial to stiff bosomed, horizontally striped shirts, which are not in general use, so strong is the urge to the negligee and informal in business dress.

The style note in question concerns a stiff bosomed shirt, the bosom being horizontally striped with fine blue stripes, the background being white. The shirt comes with two collars, one matching the striped bosom of the shirt, which, of course, is not unusual. The other collar, to be worn as an alternative, is of blue the shade of the blue stripe in the bosom, as well as the solid color of the sleeves and tails of the shirt. The contrast between collar and shirt bosom furnishes a change from the collars of the sale.

FEDERAL COURT Boycotting Charged by Trade Body.

> ing twenty-two of its officers and members, in a complaint charging unfair The association is composed of retail coal dealers of Illinois and Wisconsin

according to the complaint.

Boycotting Is Charged.

"The complaint," says the commission's official announcement, "recites various methods by which the association and its members enforces its cooperative scheme of boycotting socialed 'irregular' or 'illegitimate' dealers, such dealers being determined by the association as being outside of its definition of a retail coal dealer.

"The complaint further states the association's acts constrain producers and wholesalers of coal to confine the distribution of coal in respondents so-called 'irregular dealers,' cooperative associations and groups of

operative associations and groups of purchasers from securing coal at wholesale or from any other source than from 'regular' or 'legitimate' coal dealers, thereby unduly obstructing and hindering free competition in the distribution and sale of coal in the association's territory.

"J. B. Sanborn and company, pub-lisher of the 'Coal Dealers' Blue Book,' is listed as a respondent in the com-

plaint.

"Others individually named in the complaint are: Russell H. Jones, R. B. Herring, C. S. Dodge, I. L. Runyan, W. H. Baethke, W. J. Dambold, E. H. Keeler, A. H. Holcomb, R. S. Hunter, H. E. Eastman, J. Poultry exhibitors in gala dress yesterday iransformed Wabash avenue in front of the Collseum into the scene of a hizarre barnyard pageant. Jubilant over their winnings at the midwest poultry show, they unlocked the cages and turned their poultry out into the street for a frolic and march.

As soon as the biting wind struck cackled, ducks quacked, and turkeys gobbled.

With tapes tied on the wings of the champions, exhibitors drove their prize winning poultry in singles, pairs, and tandem through the street, in a parade such as the humming business district has never seen before.

Winners in the collegate poultry judging contest are expected to be nicked late this afternoon.

Minor Bosses Meet.

With the major league business out of the way, the National association, which embraces all the minors, held its annual open meeting yesterday and selected Hartford, Con., as the scene of next year's convention. It was the sentiment of the delegates that in the future the minors refrain from holding their sessions at the same time and place as the majors.

The association also voted to authorize an audit of the books. This subject was brought up by Dr. Charles E. Strub, president of the San Francisco club. He suggested this be done as a matter of good business and explained that no reflection was intended on the efficient manner in which Sectary Jorn Farrell has handled funds and his other duties.

City of Iron Mountain, Michigan 5% Water Works Bonds

Dated January 1, 1924. Principal and semi-annual interest (January 1st and July 1st).
payable at the Continental & Commercial National Bank, Chicago, Illinois.

Denominations \$1,000 and \$500

IRON MOUNTAIN, the judicial seat of Dickinson County, is located in the southeastern part of the Upper Peninsula about 65 miles northwest of Marinette, Wisconsin. It is an important distributing center having transportation facilities furnished by the main lines of the Chicago & Northwestern, Chicago, Milwaukee & St. Paul, and Wisconsin & Michigan Railroads. For a radius of many miles surrounding the city there is excellent farming and grazing land especially adapted to dairy farming and this section is known as Cloverland.

The City is destined to become a leading manufacturing community on account of its proximity to raw materials and cheap power. The Ford Company operates one of the most modern lumber mills in the world here, also a body plant employing over 4,000 men. The Ford Company is making large expenditures for power plant and factories and when completed it is predicted the population of Iron Mountain will be 40,000. In addition to the Ford Plant the Von Platon Fox and Northern Woven Lath Company operate large mills here. There are in the immediate vicinity several valuable iron mines. The most important being the Chapin Mine operated by the U. S. Steel Company.

Iron Mountain is substantially built with all modern improvements including paved streets, excellent schools and public parks and four banks with combined deposits of \$4,250,000.

These Bonds constitute a full and direct obligation of the entire city, payable

N 1883 — over forty years ago - the advertisement opposite appeared in and other large cities.

In those days bond advertisements were rare—this was one of the pioneers. Today practically every important bond issue offered to the public is advertised in the press.

The Harris Organization - organized as N. W. Harris & Company in 1882-believed from the start in telling as many people as possible about the bonds it had to sell. The effectiveness of this policy is evidenced, we believe, by the fact that we have sold over five billion, one hundred million dollars (\$5,100,000,000) of bonds and that our sales last year were the largest in our history - over twice those of five years ago, three times those of ten years ago and fourteen times those of twenty years ago.

If you are interested, we shall be pleased to send you our latest list of bonds (yielding from 4 to 6 per cent) which we have carefully investigated and recommend for safe investment.

First Mortgage 61/2% Serial Coupon Bonds

(Safeguarded Under athe Straus Plan)

CHICAGO'S FINEST OFFICE BUILDING

The following are the principal features of this bond issue, as set forth more completely in our bond circular.

Security: The Straus Building First Mortgage 61/2% Serial Coupon Bonds are a direct closed first mortgage on the 32-story Straus Building, and the land on which it is built, at the corner of Michigan Avenue and Jackson Boulevard, Chicago.

The land-which is owned in fee-constitutes an ideal location for such a structure, being at the intersection of Chicago's two greatest boulevards.

The building, which now is rapidly approaching completion, is generally recognized as one of the great office buildings of the world. S. W. Straus & Co. will occupy approximately five floors as its western headquarters. On the ground floor there will be stores, and the remainder of the building will be leased for offices.

Borrowing
The bonds are the direct obligation of Corporation:

of Chicago; the directors and officers of which are also directors and officers of S. W. Straus & Co., Chicago, Illinois.

Earnings: The entire building (except a portion of the fifth floor reserved for the borrowing corporation) has been leased to S. W. Straus & Co. for a period extending beyond the last maturity of the bonds. Under the terms of this lease, it becomes the obligation

of S. W. Straus & Co. to pay a net rental of \$925,000 annually to January 1, 1927, and \$1,200,000 annually for the remainder of the term of the lease, which sums are more than sufficient to meet the interest and principal payments.

Valuation: Based upon independent appraisals, the land and improvements are valued at \$18,000,000.

Amortization In accordance with the usual pro-and Monthly visions of the Straus Plan, the bonds Payments: will mature serially. Funds to meet these serial maturities and the interest payments are provided by means of monthly deposits from the borrowing corporation. The first serial maturity is January 1, 1928, and the last January 1, 1950, enabling purchasers to secure bonds maturing in any year they may select.

Guarantee of The building is now rapidly nearing Completion: completion, and leases are being closed for occupancy May 1, 1924.

Final completion, free and clear of all prior liens, is unconditionally guaranteed to the bondholders by S. W. Straus & Co.

The bonds are dated January 1, 1924. Interest coupons are payable January 1st and July 1st. Denominations, \$1,000, \$500 and \$100.

Building Activity Next Spring

Will there be increased building activity next spring with high or even higher construction costs than now prevail? Or do we face a period of general contraction in the building industry with somewhat lower costs for both labor and materials?

The latest Weekly Letter of the Harvard Economic Service pre-sents an analysis, based upon an exhaustive study of building statistics, of the probable range of activity and level of activity and level of prices in the building industry during the coming months.
